From toothpastes to flosses, MouthWashes, mouth sprays, and tongue cleaners, SuperMouth has everything you need for a comprehensive oral care routine.

Supermouth[®]

a new approach to oral care

whole mouth health

As the gateway to your body, what you put in your mouth can impact your overall health and wellness.

Our products have been meticulously crafted by leading dentists, scientists, and medical experts to bring you the ULTIM8 oral care experience.

comprehensive system

An entire line of oral care products that work together to help you achieve your oral health goals.

highest quality ingredients

Our patented formulations feature the highest quality, safest, and most effective ingredients.

innovation

introducing hydroxamin[®] MouthPaste – a “tooth”paste so revolutionary, we had to invent a new category.

- contains nano-hydroxyapatite (mineral that constitutes over 90% of teeth and enamel)
- no artificial colors, preservatives, or sweeteners
- infused with vitamins K2 and D3
- supports the health of oral microbiome
- packed with prebiotics
- fluoride and non-fluoride options

mouthcare

balance the biome, don't burn it.

- no burning from harsh chemicals, alcohol, or essential oils**
- pH balancing/non-acidic
- supports the health of oral microbiome
- contains Hydroxamin (nano-hydroxyapatite vitamin D3 and vitamin K2)
- no artificial colors, preservatives, or sweeteners
- fluoride and non-fluoride options

introducing, a pH-enomenol way to fight cavities between brushing

- for use between brushing; zaps away acid build-up (which can lead to cavities)
- freshens breath without essential oils**, artificial colors, alcohol, or sweeteners
- supports health of oral microbiome
- alkaline pH of 8.5
- packed with prebiotics

expand your horizons

- *patented expanding technology removes 40% more plaque
- no petroleum-based wax; uses safe & natural beeswax
- no PTFE (Teflon®), PFAS, or PFOA
- multiple formats including flossers, dispensers, and ortho
- infused with Hydroxamin (nano-hydroxyapatite vitamin D3 and vitamin K2)
- packed with prebiotics

*clinical study Genova University, Italy

give your mouth the inside scoop

- triple-action mouth cleaner features a specially designed brush to reach hidden areas
- studded scrubber for gentle exfoliations

- made with safe & non-toxic material supports health of oral microbiome

brace yourself for the first mouthcare system for orthodontics

60X

MORE EFFECTIVE
CLEANING THE
TEETH THAN A
MANUAL BRUSH,
INCLUDING THE AREA
AROUND THE BRACKETS
AND UNDER THE WIRES*

specially-engineered
brush head for
orthodontics

At SuperMouth, we offer oral care products for all life stages, including specialized options for orthodontic needs. In collaboration with orthodontic experts, we've developed a unique formulation of fluoride and nano-hydroxyapatite to reduce the risk of cavities as well as decalcification of teeth, common during orthodontics. Our specialized line includes floss with threaders for easier cleaning around brackets and the ULTIM8 SmartBrush with OrthoBristles designed specifically for those with braces.

pH balanced

Our toothpastes, MouthWashes, and MouthSpray help to reduce acid in the mouth which can lead to cavities.

prebiotics

Prebiotics like inulin help balance the oral microbiome by feeding good bacteria.

our ingredients

our patented formulations for MouthPaste, MouthSprays, and MouthWashes use the highest quality ingredients to ensure that every product delivers exceptional results.

nano-hydroxyapatite

This is a compound similar to the mineral component found in our teeth and bones. It is designed to support the remineralization and strengthening of tooth enamel.

Additionally, nano-hydroxyapatite may help naturally whiten teeth and reduce sensitivity.

Regular use of products containing nano-hydroxyapatite can contribute to oral health.

vitamins K2 and D3

These vitamins help improve the absorption of the nano-hydroxyapatite into the cracks and crevices where it is needed most.

*In Vitro Test to Compare the Ability of Toothbrushes to Clean the Interproximal Regions of a Tooth Model. T. Badrock, G. Thomas & G. Withers. Intertek CRS Elm House, Hooton, UK (2024).

In vitro cleaning efficacy and resistance to insertion test of interdental brushes, Diana Wolff, Daniela Joerss, Paul Rau, C.E. Dorfer, Clin Oral Invest (2006), 10:297- Interdental cleaning helps remove debris and interproximal dental plaque, the plaque that collects between two teeth to reduce the likelihood of gum disease and tooth decay. Interproximal area is the area where the teeth meet.

**SuperMouth products do not contain essential oils as defined by the United States Food and Drug Agency.
